

## PREPOL

### Primer

Prepol is a polymeric primer in aqueous dispersion. Prepol has been formulated specifically for Topciment microcements' treatment.

It has three functions: it consolidates microcement, it serves as bonding bridge and it waterproofs the surface.

### Properties

---

- Waterproof
- Resistant to microcement's alkalinity.
- Bonding bridge between microcement and water-based varnish Topsealer WT.
- Strengthenener.

### Amount needed

---

1 coat: 0,06 l/m<sup>2</sup>

### Technical data

---

- Acrylic dispersion water-based
- White milky liquid
- Solids: 14 %
- PH: between 8 and 9
- Viscosity 10-11 s (Ford Cup 4)
- Density at 20°C: 1.02 ± 0.01 g/ml
- Application temperature: from 5°C to 35°C
- Dries to touch in 20 minutes

### Application

---

Prepol is applied with a short-pile velour roller in one layer. Before applying the primer Prepol, let the microcement dry for 24 to 48 hours, depending on weather conditions. A moisture meter for mortars can be used to measure the moisture content of microcement. Reading should not exceed 5 %. The surface must be free of dust and grease. After applying Prepol, wait for at least 24 hours before sealing with Topsealer WT. It is essential to protect the surface with at least two additional layers of the varnish Topsealer WT in order to increase chemical and abrasion resistance of the coating.

## Special precautions

---

If the product comes into contact with eyes, wash with plenty of water for 15 minutes. In the event of contact with skin, wash with soap and water.

Do not ingest. If swallowed, do not induce vomiting and seek medical assistance immediately.

It is recommended to comply with the following measures:

- Good ventilation.
- Safety glasses.
- Rubber gloves.

Empty containers must be disposed of in accordance with current local regulations.

To prevent the product from drying or thickening, close the lid after each use.

This product is not toxic, dangerous or flammable under normal conditions of handling. It does not contain any harmful substances that under current regulations call for any additional measures in terms of its labelling.

Keep out of the reach of children.

## Packaging

---

Available in 1 litre and 5 litres plastic jerry cans.

## Cleaning of tools

---

Tools should be cleaned with water and soap immediately after use.

## Storage conditions

---

The product should be stored in its closed original packaging, protected from weather conditions at temperatures between 10°C and 30°C in a dry and well ventilated place, away from direct heat and sunlight. Shelf life is 12 months from the date of production if stored in well-preserved conditions.

The product should not be used for purposes other than those specified without first having instructions in writing. It is always the user's responsibility to take suitable measures in order to comply with the requirements established in local legislation. Product safety sheets are available for professionals. This technical data sheet will be valid until a new edition appears.
